The following is an examiner's statement of reasons for allowance: The claims are allowable over Frosch (408) because the applicants show, a higher yield of product and less contamination when a multiple number of nozzles introduces reactant into the the center of a tube reactor in a direction parallel to the direction of the tube versus using only one nozzle as in Frosch and the comparative example for the preparation of isocyanate from amine and phosgene.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
